

As we did not get much information from Rose, and we were unable to use a builder, our website for Rose is much simpler. It will primarily consist of HTML and CSS, with all products linking back to Rose's other product website. As such, there will be no shopping cart on this website. So far we have a simple design with her products posted right on the home page. How she will use this site is unclear, but at least she will have a way to promote her products and link to her other stores.

On this page the navigation menu is on the left side. The Navigation bar includes product categories, which are brought up on the right side. On the right side there will be an image, title, and price.

In addition, we have an 'About Us' page that will provide a place for Rose to describe herself and her brand. Below this will be a contact form that will allow users to send messages to Rose.
